# Tracing and Analysis Features for TriCore/ MCDS/ AURIX<sup>™</sup> with Lauterbach TRACE32 - Live Online Training

#### Objectives

This training addresses those who want to extend their knowledge of debugging with the Lauterbach TRACE32 toolchain by various tracing techniques. Both generic functions (software-based) and specific applications (hardware-supported trace unit based on the AURIX<sup>™</sup> microcontroller platform) are highlighted and demonstrated, also in the context of the Lauterbach scripting language Practice. The training moreover covers flexible analysis features for an efficient evaluation of the recorded data. Attendees work on fully functional target platforms enabling them to directly apply and reproduce what they just learned.

#### **Participants**

Hardware and software developers, test engineers, verification engineers, application engineers, integrators, fault analysts

#### Requirements

Basic knowledge of the AURIX<sup>™</sup> microcontroller architecture. Basic knowledge of TRACE32 (ideally, obtained in our training "Multicore Debug for TriCore/AURIX<sup>™</sup> with Lauterbach TRACE32")
