Hardware Security Module (HSM) of the AURIX[™] Platform - Live Online Training

Objectives

You know the architecture, on-chip peripherals and features (especially related to the host aspects) of the HSM module of the AURIX[™] device family.

You get to write and apply low-level drivers for this hardware, interact with the host, adapt examples as required and test them with a debugger.

Numerous demos and exercises intensify the theoretic content.

YOUR BENEFIT:

Efficient and compact jump-start into the overall topic

System-wide approach

Training documentation in electronic format

Participants

Hardware and software architects, hardware and software developers, test engineers, design engineers, system designers

Requirements

HSM NDA (non-disclosure agreement) with Infineon; experience in microcontroller/microprocessor system programming and architecture; basic security knowledge; AURIX system knowledge (ideally, based on our AURIX-2G training)

Live-Online-Training

30.01. – 31.01.20251.500,00 €2 Days

* Price per attendee, in Euro plus VAT

Training code: LE-HSM

Face-To-Face - English

Date Duration 05.09. – 06.09.20242 days

Live Online - German

Date Duration 30.01. – 31.01.20252 days

Face-To-Face - German

Date Duration
