

TRAVEO™ T2G: Microcontroller Architecture for Automotive Applications

Objectives

You know the architecture, basic on-chip peripherals and the features (especially related to multicore and safety extensions) of the TRAVEO[™] T2G device family.

You get to apply low-level drivers for this hardware, adapt examples as required and test them with a debugger.

Numerous exercises make this training a practice-oriented software workshop.

Your benefit:

Efficient and compact jump-start into the overall topic

Practical tips on multicore and safety

Participants

Hardware and software architects, hardware and software developers, test engineers

Requirements

ANSI-C knowledge; experience in microcontroller/microprocessor system programming and architecture

TRAVEO™ T2G: Microcontroller Architecture for Automotive Applications

Content

Introduction to the XMC7000 Microcontroller Architecture CPU and CPU Subsystem (CPUSS) **On-Chip Flash** Address Map **Protection Fault-System Crypto Module** Inter-Processor Communication (IPC) Ports (GPIO) Interrupt and Exceptions DMA **Event Generator (EVTGEN) Trigger Multiplexer (TRIG-MUX) Real-Time Clock Module (RTC)** Watchdog Timer (WDT) Timer Counter Pulsewidth Modulator Module (TCPWM) Reset Clock

Power ROM Flash Boot CAN-FD Serial Communication Block (SCB) LIN-UART Inter-IC Sound Bus (I2S) Giga Ethernet Serial Memory Interface (SMIF) Analog Digital Converter (ADC) Digital Analog Converter (DAC) Debug Support

FACE-TO-FACE TRAINING

Price *Duration-5 days

Training code: E-TRAVEO2 * Price per attendee, in Euro plus VAT

Face-To-Face - German

Duration

5 days

Coaching

Our coaching services offer a major advantage: our specialists introduce their expertise and experience directly in your solution process, thus contributing to the success of your projects.

We will be happy to provide you with further information or submit a quotation tailored to your requirements.
